

Sabbir Ahmed Akash

Dhaka, Bangladesh | sabbirahmedakash277@gmail.com | <https://github.com/sabbirahmed277>
<https://www.linkedin.com/in/Sabbir277/> | +880 1567-963427

Objective

CSE undergraduate with hands-on experience in academic and practical projects, skilled in problem-solving, Artificial Intelligence, and Machine Learning. Passionate about applying technical knowledge to real-world challenges and building practical, effective solutions.

Skills

Programming Languages: Python, C, C++, Java
Data Science & AI: Pandas, NumPy, Matplotlib, Scikit-learn, PyTorch
Web & DB: HTML, CSS, JavaScript, PHP, MySQL
Tools & Version Control: Git, GitHub
Problem Solving: LeetCode: sabbir277

Projects

- 🔗 **TexMate** *Django, Next.js, Google Authentication, Meta LLM (Agentic Integration)*
 - Developed **TexMate**, an intelligent learning and collaboration platform — an alternative to **Overleaf**.
 - Integrated **Meta LLM agents** for real-time document assistance, formatting, and context-aware editing.
- 🔗 **Movie Database System** *Java, Object-Oriented Programming, File Handling*
 - Developed a Movie Database System using core **OOP concepts** such as classes, objects, inheritance, and encapsulation.
 - Implemented file-based using Java files to manage and retrieve movie records efficiently.
- 🔗 **Air Ticket Booking System** *HTML, CSS, JavaScript, PHP, MySQL*
 - Built a web-based air ticket booking system enabling users to search, book, and manage flight tickets.
 - Designed the frontend using HTML, CSS, and JavaScript and implemented backend functionality with **PHP** and **MySQL**.
- 🔗 **Image Preprocessing & Text Detection** *Python, Machine Learning, Image Processing, SSD MobileNet, Faster R-CNN, EasyOCR*
 - Developed an advanced **text detection system** that extracts and recognizes text from images using **Python** and machine learning techniques.
 - Applied **image denoising** for preprocessing and improved object detection accuracy.
 - Performed object detection using **SSD MobileNet** and **Faster R-CNN**, and drew bounding boxes around detected objects.
 - Implemented **EasyOCR** for extracting text from images and computed evaluation metrics such as **precision, recall, and F1-score**.
 - Compared performance of SSD MobileNet and Faster R-CNN for higher accuracy in text detection tasks.

Education

2022 – 2026 Green University of Bangladesh
BSc in Computer Science and Engineering

Participation

- Intra Department Programming Contest (IDPC) - GUB

Experience

Software Engineering Intern (February 2026 - May 2026) *Iching Software Lab*

- Completing frontend development tasks using Vue.js during the internship.
- Developed and improved user interfaces, fixed UI-related issues, and supported ongoing web application maintenance.
